### KEY SELLING POINTS

- ◆ Concise presentation of information
- ◆ Clear explanation of problems and solutions
- ◆ Outstanding value for money
- ◆ **Free Photo CD Rom**

### BOOK INFORMATION

Price: £16.99

ISBN 10 - 1 905740 026

ISBN 13 – 978 1 905740 024

Pub Date: December 2006

Format: Paperback

Extent: 360 pages

The pregnant patient presents a unique “two-in-one” situation for the anaesthesiologist – what happens to the mother has a bearing on her unborn child, and the foetus produces many physiological changes in the mother, which have important anaesthetic implications.

Considerations unique to the pregnant state are dealt with, the potential problems to be faced and the various solutions to those issues.

This handy pocket reference is designed to be a readily accessible and accurate source of information on obstetric anaesthesia for practising anaesthesiologists, anaesthesia residents and “interested” obstetricians.

### Contents:

- |   |   |
|---|---|
| 1. Anaesthesia Work Station Check up                      | 14. Pregnancy, Asthma and Anaesthesia                     |
| 2. Monitoring Standards                                   | 15. Pregnancy, Anaemia and Anaesthesia                    |
| 3. Maternal Physiology in Pregnancy                       | 16. Pregnancy and Diabetes Mellitus                       |
| 4. Preoperative and Airway Assessment of Pregnant Patient | 17. Coagulation Problems and Anaesthesia                  |
| 5. Non-Obstetric Surgery in Pregnancy                     | 18. Anaesthesia for Obese Parturient                      |
| 6. Anaesthesia for Assisted Reproductive Techniques       | 19. Neurological Diseases and Anaesthesia                 |
| 7. Anaesthesia for Foetal Surgery                         | 20. Anaesthesia for Kyphoscoliotic Parturient             |
| 8. Labour Analgesia                                       | 21. HIV, Anaesthesia and Anaesthetist                     |
| 9. Anaesthesia for Caesarean Section                      | 22. Arterial Blood Gas Analysis                           |
| 10. Anaesthesia for Complicated Obstetrics                | 23. Critical Care in Obstetrics                           |
| 11. Postoperative Care                                    | 24. Cardiopulmonary Resuscitation of the Pregnant Patient |
| 12. Anaesthesia Emergencies                               | 25. OT errors and Accidents                               |
| 13. Pregnancy and Cardiovascular Disease                  | 26. Legal Issues  |
|   | 27. Obstetric Anaesthesia Practice Guidelines             |
