Basic Statistics

By (author) B. L. Agarwal

808pp., £40.00 / $70.00

ISBN 978 1 848290 679 (Paperback)

Publication: 6th June 2013

THE BOOK

This is the first international edition of a successful textbook with an outstanding pedigree. It covers a wide range of statistical theory commonly taught in faculties worldwide. This theory is followed by relevant formulae, which are fully supported by solved numerical problems. However, no advanced knowledge of mathematics is required.

The content is divided into 24 chapters, with problems and exercises to be tackled using SPSS. Two chapters – Research Processes and Experimental Research Designs - ensure that the book can be used in its entirety as a course text, but it is equally valuable to academics and students as a reference work to be consulted on a chapter by chapter basis.

CONTENTS

Appendix A: Mathematics for Statistics
Appendix B: Statistical Tables
Answers to Numerical Problems

KEY SELLING POINTS

1. Successful textbook with proven sales history
2. Comprehensive, multi discipline
3. Mathematically undemanding
