BOOK INFORMATION

ISBN: 1 904798 144
Pub Date: April 2004
Format: Hardback – 252 x 192mm
Extent: 140 pages
Six colour printing

This book records the enormous experience of a team of endoscopists who are leaders in the field of hernia repair. With a step-by-step approach, the book reflects the principles of treatment followed by the Department of Minimal Access Surgery at Sir Ganga Ram Hospital, New Delhi. The book aims to provide the beginner with a systematic and structure approach to endoscopic repair of abdominal wall hernias, including trouble-shooting.

Contents: Hernia repair by minimal access surgery; Historical aspects of laparoscopic hernia repair; Endoscopic anatomy; SGRH Classification for endoscopic repair of hernias; prosthetics and fixation devices; SGRH approach to endohernia repair; Anaesthetic implications for endohernia repair; Total extraperitoneal repair of groin hernia; Transabdominal preperitoneal repair; Trouble-shooting – in groin hernia and abdominal wall hernias; Conversion and complications in total extraperitoneal repair; Laparoscopic repair of abdominal wall hernias.
