BOOK INFORMATION

ISBN: 81 8061 0322
Pub Date: **March 2004**
Format: Hardback
Extent: 230 pages

The purpose of this book is to provide clear, concise and in depth knowledge and use of colour Doppler in various systems of the body including its historical perspective and instrumentation. The utility of colour Doppler in various body systems such as abdomen, peripheral vascular diseases and small parts has been dealt clearly with supportive illustrations. A separate chapter has specifically been given on value of colour Doppler in obstetrics, gynaecological lesions and infertility. The book will be an essential guide to postgraduates, practicing physicians, obstetricians and gynaecologists and radiologists in their day-to-day practice.
