BOOK INFORMATION
Price: £15.99
ISBN: 1 904798 659
Pub Date: September 2005
Format: Paperback
Extent: 145 pages, 140 figures

A cataract is the most common cause of blindness worldwide, and phacoemulsification is the most common method of cataract surgery. Specific techniques of phacoemulsification are constantly updated and improved, thanks to the equipment now available to the ophthalmic surgeon, and the skills required to use it.

There are a number of large recently published books on the market which deal with phacoemulsification surgery in great detail, but until now there has been no single title available which condenses the required information into a smaller, more accessible format.

Phacoemulsification Made Easy has been written by Dr Aasheet Desai and Dr Jack Kanski, the latter being the world’s best selling author of ophthalmology books. It is aimed primarily at trainee ophthalmologists, but will also be of interest to anyone involved in ophthalmology, from students to practising ophthalmic surgeons.

Contents:
1. Preoperative Considerations
2. Anaesthesia
3. Preparation for Surgery
4. Phacodynamics
5. Phacoemulsifiers
6. Paracentesis and Incision
7. Viscoelastics
8. Capsulorrhesis
9. Hydrodissection
10. Phacoemulsification
11. Irrigation and Aspiration
12. Insertion of IOL and Completion
